01	Tomasz KISIELEWICZ, Carlo MAZZETTI, Giovanni Battista LO PIPARO, Bolesław KUCA, Zdobysław FLISOWSKI - Lightning electromagnetic pulse (LEMP) influence on the electrical apparatus protection	1
02	Tomasz WOLNIK - Comparison of the ratio of torque density of two designs of permanent magnet motors	05
03	Marcin BARAŃSKI, Artur POLAK, Adam DECNER - Bearings vibration diagnosis based on hodograph XY	10
04	Jurij OWCZYNNIKOW, Dominik WOJTASZCZYK - Disc generator to a small wind turbine	13
05	Piotr BOGUSZ - The laboratory stand for testing of light electric vehicles drives - design and implementation	16
06	Bohdan BOROWIK, Barbara BOROWIK - Microcontrollers diagnostic system for evaluation of Stirling engine	20
07	Ryszard PAWEŁEK, Irena WASIAK - Influence of frequency converters on power quality in power station ancillary services network. Part 1 – Monitoring in real network	24
08	Irena WASIAK, Piotr GBURCZYK, Ryszard PAWEŁEK - Influence of frequency converters on power quality in power station ancillary services network. Part II – Simulation investigations	29
09	Robert BIEDA, Rafał GRYGIEL - 3D object orientation with naive Kalman filter	34
10	Marek LEŚNIEWICZ - Expected Entropy as a Measure and Criterion of Randomness of Binary Sequences	42
11	Adam KOWALCZYK, Anna SZLACHTA, Robert HANUS - Niepewność standardowa oceny funkcji korelacji wzajemnej wyznaczonej metodą warunkowej wartości średniej modułu sygnału	47
12	Tamara SAVCHUK, Andriy KOZACHUK, Konrad GROMASZEK, Laura SUGUROVA - Forecasting the state of technogenic emergency situation on the railway transport using data mining technologies	50
13	Tamara SAVCHUK, Anton SAKALIUK, Waldemar WÓJCIK, Aron BURLIBAY - Transformation of “user-object” matrix for the collaborative filtering	55
14	Olessya YUCHSHENKO, Waldemar WÓJCIK - Stress dependence on the band thickness in a continuous hot zinc-plating line	60
15	Grażyna FRYDRYCHOWICZ-JASTRZĘBSKA, Artur BUGAŁA - Comparison of the efficiency of solar modules operating with a two-axis follow-up system and with a fixed mount system	63
16	Paweł SURMA - A comparison between P&O and Fuzzy Logic methods for tracking the maximum power point	66
17	Beata KRUPANEK, Ryszard BOGACZ - Investigations of transmission delays in ZigBee networks	70
18	Artur WODOŁAŻSKI - Modeling of the methanol synthesis in plate microreactor	76
19	Karina JANISZ, Igor BORDUN, Vadym PTASHNYK, Volodymyr POHREBENNYK - Role of Ionic Transport in the Electrochemical Activation of Water Solutions	80
20	Aleksandr NIKITIN - Virtual Design-Driven Framework for Electronic Design Automation systems	84
21	Mark KLETSEL, Nariman KABDUALIYEV, Bauyrzhan MASHRAPOV, Alexander NEFTISSOV - Protection of busbar based on reed switches	88
22	Toomas VAIMANN, Anouar BELAHCEN, Javier MARTINEZ, Aleksander KILK - Detection of induction motor broken bars in grid and frequency converter supply	90
23	Radim SIFTA, Petr MUNSTER, Ondrej KRAJSA, Miloslav FILKA - Simulation of bidirectional traffic in WDM-PON networks	95
24	Darius ANDRIUKAITIS, Nerijus BAGDANAVICIUS, Vytautas JOKUZIS, Sarūnas KILIUS - Investigation of Prospects for Electric Vehicle Development in Lithuania	101
25	Majid HOSSEINPOUR, Mustafa MOHAMADIAN, Ali Yazdian VARJANI - Design and Analysis of the Droop-Controlled Parallel Four-leg Inverters to Share Unbalanced and Nonlinear Loads	105
26	Philemon Daniel, Rajeevan Chandel - Dynamic Ruleset Based Online Concurrent Testing of Functional Faults for Embedded Controllers	111
27	Robert ZIEMBA - Modeling of the grounding systems buried in heterogeneous soil	115
28	Karol SZOSTEK - Sequential processor design and simulation in MATLAB/Simulink environment	119
29	Grzegorz KARNAS, Stanisław WYDERKA, Robert ZIEMBA, Kamil FILIK, Grzegorz MASŁOWSKI - Analysis of lightning current distribution in lightning protection system and connected installation	122
30	Mirosław MAZUREK, Paweł DYMORA - Network anomaly detection based on the statistical self-similarity factor for HTTP protocol	127
31	Małgorzata ŁATKA - Assessing electric power quality parameters in street lighting system using LED-type light sources	131
32	Anna KOZIOROWSKA, Jacek BARTMAN - The influence of reactive power compensation on the content of higher harmonics in the voltage and current waveforms	136
33	Karol SZOSTEK, Roman SZOSTEK - Model of the heat energy transmission from deep rocks to the energy recovery system	141
34	Kamil FILIK, Grzegorz KARNAS, Grzegorz MASŁOWSKI, Stanisław WYDERKA, Robert ZIEMBA - Functional investigations of surge generator for immunity tests of avionics	144
35	Paweł DYMORA, Mirosław MAZUREK, Dominik STRZAŁKA - Long-range dependencies in quick-sort algorithm	149
36	Tomasz RUDNICKI, Robert CZERWIŃSKI, Andrzej SIKORA - Propulsion system of permanent magnet motor with sinusoidal back-EMF	153
37	Łukasz ADAMCZYK, Leszek JAROSZYŃSKI, Marcin KAFARSKI, Tadeusz JANOWSKI, Janusz KOZAK, Michał MAJKA - The analysis of the process of limiting the short circuit current by superconducting fault current limiters	157
38	Adam KOWALCZYK, Radosław CIEŚLAK, Rafał CHORZĘPA - An analysis of the causes of disturbance in measurement of ClO ₂ on the example of Water Treatment Plant	161
39	Leszek JAROSZYŃSKI, Tadeusz JANOWSKI - YBCO coated conductors for superconducting transformer windings	164
40	Paweł DYMORA, Mirosław MAZUREK - A comparative study of self-adopting fault tolerant protocols in wireless sensor networks	157

PRZEGLĄD ELEKTROTECHNICZNY Vol 2014, No 1

Contents

41	Tomasz DRABEK, Sebastian LATOSIEWICZ - Use of the Halbach array in coreless disk type motors	171
42	Damian MAZUR, Zygmunt SZCZERBA - Preliminary Studies of the Wind Turbine with the Vertical Configuration in the Aerodynamic Tunnel and analytical DMS model	175
43	Karol SZOSTEK - Constructing logics of finite-state machine in the Matlab Simulink environment	179
44	Jerzy MARZECKI, Bartosz PAWLICKI - End user loads forming based on voltage frequency value	182
45	Jan KAPINOS, Tadeusz GLINKA, Bronisław DRAK - Typical causes of operational failures in power transformers working in National Grid	186
46	Tadeusz GLINKA, Waldemar OLECH, Barbara KULESZ, Andrzej SIKORA - Identification of operating conditions of transformer working in power electronics circuit	190
47	Stefan PASZEK, Adrian NOCÓN, Andrzej BOBÓN, Łukasz MAJKA, Sebastian BERHAUSEN, Piotr PRUSKI, Dominik SZUSTER - Measurement methods for parameter estimation of the mathematical models of component elements of generating units operating in the Polish Power System	193
48	Andrzej CICHON, Sebastian BORUCKI, Jerzy SKUBIS - New diagnostic method of on-load tap changers (OLTCs)	196
49	Paweł BERGER, Andrzej CICHON - "Finger print" of acoustic emission signals generated by power transformers on-load tap changer)	199
50	Kazimierz JAGIELA, Janusz RAK, Marek GAŁA, Marian KĘPIŃSKI - The high harmonics in the three-winding transformers used in metallurgical drive converters	202
51	Edward ANDERSON, Janusz KAROLAK, Józef WIŚNIEWSKI - Internal overvoltages in unit transformer windings	206
52	Michał MNICH, Maciej WILK - Modern technical solutions and their impact on selected parameters of the regulating generator step up transformer type TOBNRLa 290000/400	209
53	Arkadiusz KULIK, Adam KOZAKIEWICZ - The development of production of power transformers in TurboCare Poland SA	213
54	Wojciech PLUTA, Marian SOIŃSKI - Application conditions of wattmeter with oscilloscope method to determination of magnetic properties of ferromagnetic cores	217
55	Zbigniew Hilary ŻUREK, Dariusz BARON - Operational instability of magnetic and electric parameters of stator core sheets in generator type TWW-200-2A	221
56	Jan ZAWILAK, Tomasz ZAWILAK - High efficiency permanent magnet synchronous motor	224
57	Waldemar OLECH, Daniel PAWŁOWSKI, Jerzy WOŚ - Technical aspects of qualification transformers for repairs and modernization	227
58	Stawomir SZYMANIEC, Zbigniew PLUTECKI - The Analysis Of the Influence of Environmental Conditions on the Measurement of Emission Partial Discharges in Electrical Machines	229
59	Jan ADAMEK, Roman KROK, Eugeniusz PRYSOK, Damian KARDAS, Rafał MANIARA - Axial-flow fans modernization with back guide blades in shields for the generators type TWW-230	232
60	Sebastian BORUCKI, Andrzej CICHON, Jerzy SKUBIS - Assessment of mechanical construction of power transformer cores based on an analysis of the cumulative spectral power density measured vibrations	236
61	Tomasz DUSZA, Szczepan BOJARA, Piotr RUDOLF - Consolidation of winding ends as a method of generator life-time extension	239
62	Janusz KAROLAK, Jerzy PRZYBYSZ, SYLWIA WRÓBLEWSKA, Paweł BERGER - Circuit breaker defect as a reason of large turbo generator failure	242
63	Paweł RÓZGA - Electrical strength of transformer insulating liquids based on synthetic and natural esters	245
64	Ryszard SOBOCKI - Elements of the OFF- and ON- LINE diagnostic methods of the power transformer bushings	248
65	Paweł DRZYMAŁA, Henryk WELFLE - The use of neural networks in the approximation of material characteristics on the example of a shunt reactor optimization	251
66	Michał RAD, Witold RAMS, Wojciech KANDORA - Fault diagnostics of AC electric machines cores based on scanning of magnetic field	254
67	Krzysztof TOMCZUK - Prototype of electronic ballast to increase the radiation energy of discharge lamps	257
68	Juliusz KAROLAK - Measurements of illuminating surface at topological operation tables	261
69	Tomasz TARGOSIŃSKI - Analysis of quality of road illumination by headlamps on field conditions	266
70	Eugeniusz CZECH, Irena FRYC - Power control method of color LEDs based luminaires, emitting constant light output, independent from the conditions of its operating environment	270
71	Rafał KRUPIŃSKI - Floodlighting of public services objects based on an example town – hall in Jawor	273
72	Małgorzata ZALESIŃSKA, Krzysztof WANDACHOWICZ - Reconstitution in the laboratory luminance distributions occurring in the field of driver's vision	277
73	Krzysztof WANDACHOWICZ, Wiesław KUCZKO - Verification the method of calculation luminaires reflectors	281
74	Lech BOROWIK, Marek KURKOWSKI A - Energy audit and energy consumption in interior lighting installations	285
75	Andrzej PAWLAK, Krzysztof ZAREMBA - Impact of calculation parameters on Monte-Carlo simulation errors for indirect lighting	288
76	Marian GILEWSKI - The zero-switched laser diode driver	291
77	Lech GRODZKI - LED Driving Circuits Without Feedback	294
78	Maciej ZAJKOWSKI, Urszula BŁASZCZAK, Jacek KUSZNIER - Application of side optical fibres in diagnostics of LED lamp	297
79	Irena FRYC, Eugeniusz CZECH - Constructing luxmeters with optimal its spatial correction parameters	300
80	Piotr TOMCZUK - Assessment of the state of chosen pedestrian crossing lighting on the basis of luminous flux density	303
81	Małgorzata ZALESIŃSKA - Analysis of the impact of road lighting system parameters on the visibility level	307
82	Tadeusz MACIOŁEK, Michał GŁOWACZ - Pantograph-tram catenary cooperation at crossing	311
83	Summer School for young scientists	315
84	XV International Workshop for young scientists	317
