

PRZEGLĄD ELEKTROTECHNICZNY Vol 2011, No 2

Contents

01	Mariusz JAGIEŁA, Tomasz GARBIEC - Three-dimensional calculations of eddy-current distribution – application of description of the finite element geometrical forms	1
02	Mariusz JAGIEŁA, Marian ŁUKANISZYN - Field approach to electromagnetic design of high-efficiency induction motors – state of the art and future	5
03	Ryszard BENIAK, Arkadiusz GARDECKI, Józef MOCH - Measurements of electrical drives in dynamic states using dedicated measurement systems	9
04	Krystyna MACEK KAMIŃSKA; Marcin KAMIŃSKI - Identification of parameters of high-efficiency motor and development of relational database	13
05	Grzegorz BADOWSKI, Jerzy HICKIEWICZ, Piotr PLUTA - Economic evaluation of energy efficient motors application	17
06	Ryszard BENIAK, Arkadiusz GARDECKI - Multivariate analysis of selected states of the converter drive that allows evaluating efficiency and environmental impact of power electronic part of drive	22
07	Marcin KAMIŃSKI - Different technologies in computer simulation of electromechanical objects	26
08	Zbigniew ŁAWROWSKI, Andrzej OKOŃ - The experience in diagnostics of isolation the of inductive engines co-operating with frequency changer arrangements of adjustment	30
09	Jan Marek LIPIŃSKI - Factors influencing vibration level of two-poles electric motors	34
10	Zbigniew ŁAWROWSKI, Maciej BOJAR - The use of investigations the infrared photography of high resolution in diagnostics of electric machine engines	37
11	IX Seminar SPE 2010 „Problems of exploitation in electromechanics”	40
12	Technical University of Opole – Division of Electrical Engineering, Control and Informatics	42
13	Marek HÖGER, Pavol RAFAJDUS, Peter BRACINÍK, Lukáš KANKULA - The specification of data needed for fault location in medium voltage distribution networks based on triangulation principle	44
14	Szymon CIURA - Prognostication of values of parameters that characterize continuity of consumers' supply from the MV overhead distribution networks	49
15	Kazimierz DAŚAL, Tomasz POPLAWSKI, Jacek ŁYP, Ewelina STARCZYŃSKA - Research the influence of temperature on the changeability of load in PPS	53
16	Waldemar DOŁĘGA - The role of distribution system operator in the context of energy security – the case of Poland	57
17	Grzegorz DUDEK - Neuro-fuzzy approach to the next day load curve forecasting	61
18	Stanisław MIŚAK, Štefan HAMACEK - Optimization of the overhead lines insulation system	65
19	Piotr HELT, Dariusz BACZYŃSKI, Marek MANIECKI, Krzysztof KOŁODZIEJCZYK - Concept of ElGrid – system for optimization and development of power distribution network	70
20	Stanislav MISAK, Lukas PROKOP, Jiri DVORSKY - Optimizing the mathematical model for prediction of energy production in wind power plants	74
21	Daniel HLUBEN, Michal KOLCUN - Use of PST in transmission system of the Slovak Republic	79
22	Andrzej JADERKO - Convergence analysis of the mutual inductance identification algorithm of the induction motor	83
23	Roman KORAB - Possibilities of increasing the Polish cross-border transmission capacity	87
24	Vladimír KRÁL, Stanislav RUSEK, Ladislav RUDOLF - Software for calculation of technical losses in transmission network	91
25	Lech BOROWIK, Marek KURKOWSKI - Analysis of parameters of electric compact fluorescent lamps	94
26	Jacek ŁYP, Tomasz POPLAWSKI, Ewelina STARCZYŃSKA - The comprehensive analyze of influencing meteorological factors on load variation in the National Power System	97
27	Lubomir MARCINIAK - Application of signal wavelet decomposition for identification of arc earth faults	101
28	Zdeněk HRADÍLEK, Petr MOLDRÍK, Roman CHVÁLEK - Electrical energy storage systems	105
29	Mariusz NAJGEBAUER, Krzysztof CHWASTEK, Jan SZCZYGLÓWSKI - Energy efficient distribution transformers	111
30	Paweł PIOTROWSKI - Monthly electric energy consumption and peak power different time horizons forecasting for electrical utilities	115
31	Andrzej POPENDA, Andrzej RUSEK - Influence of converter-fed ac drives on vicinity	119
32	Maksymilian PRZYGRÓDZKI, Edward SIWY - Assessment of grid infrastructure transmission capacity in the context of wind generation development	123
33	Antoni SAWICKI, Łukasz ŚWITOŃ, Ryszard SOSIŃSKI - The influence of the a.c. magnetic field on electrical characteristics of the mercury lamp	127
34	Antoni SAWICKI - Assessment of power parameters of asymmetric arcs by means of the Cassie and Mayr models	131
35	Janusz SOWIŃSKI - Influence of the CCS systems in power plants on electricity price	135
36	Adrian HALINKA, Piotr RZEPKA, Mateusz SZABLICKI, Michał SZEWCZYK - Impact of proper functioning of power system automation for the safety of power system in the consideration of the new technical and economical solutions in Polish Power Grid	140
37	Waldemar SZPYRA - Efficiency of compensation of no load reactive power losses of MV/LV transformers	144
38	Bożena MATUSIAK, Anna PAMUŁA, Jerzy S. ZIELIŃSKI - New idea in power networks development. Selected problems	148
39	Marcin BASZYŃSKI, Stanisław PIROG - The high speed drive control system for the low power induction machine	151
40	Mirosław PAROL, Daniel DOMŻAŁA - Integration and managing of distributed generation sources in residential buildings with use of KNX system	157

PRZEGLĄD ELEKTROTECHNICZNY Vol 2011, No 2

41	Tadeusz KACZOREK - Asymptotic stability of positive continuous-time linear systems with mutual state-feedbacks	163
42	Marcin MORAWIEC - Application of the state observer to identify squirrel-cage induction machine	167
43	Miroslaw GAJER - The implementation of Example-Based Machine Translation method in specialized machine translation systems	173
44	Piotr MUSZNICKI, Jean-Luc SCHANEN, Pierre GRANJON, Jarosław JUSZCZ - Impact of dielectric deterioration on the conducted EMI emissions in the DC-DC boost converter	179
45	Jan STASZAK, Krzysztof LUDWINEK, Piotr LEŚNIEWSKI - PICAXE microprocessor system used to control of DC commutator motor with permanent magnets	184
46	Paweł DRZYMAŁA, Henryk WELFLE - Numerical methods in modeling of large power transformer windings	191
47	Tadeusz KNYCH, Beata SMYRAK, Monika WALKOWICZ - The characterization of the oxygen free-copper technology production applications for electrical uses	195
48	Tomasz GRZEJSZCZAK - Semantic representation of Block World Environment: algorithm of scene reasoning from incomplete information	201
49	Ji SHENGCHANG, Zhu LINGYU, Li YANMING - Study on transformer tank vibration characteristics in the field and its application	205
50	Yang HAN, Lin XU, Muhammad MANSOOR KHAN, Chen CHEN - Power balancing control strategies for the cascaded H-bridge multilevel DSTATCOM	212
51	Bystrík DOLNÍK, Juraj KURIMSKÝ - Contribution to earth fault current compensation in middle voltage distribution networks	220
52	Roman SOTNER, Bretislav SEVCIK, Lubomir BRANCIK, Tomas DOSTAL - Multifunctional adjustable biquadratic active RC filters: design approach by modification of corresponding signal flow graphs	225
53	İlhan TARIMER, M.Emin GÜVEN, Serdal ARSLAN - Computer aided design of an electromagnetic ignition coil for high speed benzine engines	230
54	Vladimir V. EZHELA, Zygmunt Lech WARSZA - Evaluation of results of the indirect multidimensional measurements	236
55	Janusz DULAS - Fast method of noisy phonemes identification included in digits spoken in Polish	242
56	Bogdan GRZYWACZ - New concept for control of linear and nonlinear plants	246
57	Dariusz SZTAFROWSKI, Zbigniew WRÓBLEWSKI, Marcin ŁUKASZEWICZ - Evaluation of how low frequency magnetic field 50 Hz affect living cells	250
58	Dorota MOZYRSKA, Irena FRYC - Approximation of spectroradiometric data by fractional model	255
59	Stanisław GAD, Agnieszka PAWLAK - The economic effects of co-firing biomass with coal	258
60	Marian GŁUSZKO - Corrosion hazard of energetic lines exploited area in atmospheric conditions	263
61	Mohammad ARASTEH, Abdolreza RAHMATI, Shahrokh FARHANGI, Adib ABRISHAMIFAR - Review of overvoltage and resonance problems and reduction of in a DTC-controlled five-level flying capacitor drive	269
62	Piotr J. SERKIES, Krzysztof SZABAT - Predictive position control of the drive system with elastic joint	276
63	Kristina ČELIĆ, Martin DADIĆ, Velimir VRZIĆ - Influence of stator damper winding on magnetic and vibroacoustic parameters of turbogenerators	280
64	Ireneusz OLSZEWSKI - An algorithm of choosing LSPs in the MPLS network with unreliable links	285
65	Fangming RUAN, Tomasz DLUGOSZ - Analysis of partial vacuum formation and effect on discharge parameter in short gap ESD	291
66	Jerzy HICKIEWICZ - 100 th anniversary of the foundation of the Subfaculty of Electrotechnics at the Lwów Technical University (<i>Politechnika Lwowska</i>)	294
67	New books: Jakub Bernatt: „Electrical and magnetic circuits of the electric machines with permanent magnet excitation” (<i>Tadeusz Glinka</i>)	301
69	EMIT S.A. –Cantoni Group	303
