|----|---|-----|
| 01 | <b>Paolo DI BARBA, Maria Evelina MOGNASCHI, Marco BULLO, Fabrizio DUGHIERO, Michele FORZAN, Sergio LUPI, Elisabetta SIENI</b> - Field models of induction heating for industrial applications   | 1   |
| 02 | <b>Stan ZUREK</b> - Systematic measurement errors of local B-coils due to holes   | 6   |
| 03 | <b>João T. L. S. CAMPOS, Huilman S. SANCA, Flavio B. COSTA, Benemar A. de SOUZA</b> - Distance Protection Analysis Applied for Distribution System with Distributed Generation  | 13  |
| 04 | <b>Amina ECHCHAACHOUAI, Soumia EL HANI, Ahmed HAMMOUCH</b> - Comparison of three estimators used in a sensorless MPPT strategy for a wind energy conversion chain based on a PMSG   | 18  |
| 05 | <b>Piotr SOBANSKI</b> - Transistor Fault Diagnostic Methods in the AC/DC Line-Side Converter  | 23  |
| 06 | <b>Piotr FALKOWSKI</b> - Predictive torque and flux control – weighting factor selecting  | 30  |
| 07 | <b>Piotr GRZEJSZCZAK, Marek SZYMCZAK, Roman BARLIK</b> - Digital controller of bidirectional multi-modular DC//DC converter implemented in FPGA   | 38  |
| 08 | <b>Michał HARASIMCZUK, Adam BORCHERT</b> - Single switch quasi-resonant ZVS converter with tapped inductor  | 44  |
| 09 | <b>Jacek KABZIŃSKI, Przemysław MOSIOŁEK</b> - Adaptive Control of Two-Mass Drive System with Nonlinear Stiffness  | 49  |
| 10 | <b>Zbigniew KACZMARCZYK, Michał ZELLNER, Krystian FRANIA</b> - Power losses and equivalent resistance associated with cyclic charging and discharging of nonlinear output capacitance of MOSFET transistor  | 55  |
| 11 | <b>Marcin KASPRZAK, Krzysztof PRZYBYŁA</b> - Comparison of 300 kHz Class D-ZVS inverters for induction heating with MOSFET transistors based on Si and SiC  | 60  |
| 12 | <b>Kamil KIEREPKA, Piotr LEGUTKO, Marcin KASPRZAK</b> – Single series simultaneous dual frequency inverter for induction heating, hard switching operation issue  | 65  |
| 13 | <b>Piotr LEGUTKO</b> - The Class E Inverter (30 MHz, 300 W) with Low-Losses and Fast Switching Hybrid Driver for DE Series MOSFET Transistors   | 69  |
| 14 | <b>Krzysztof OBREBSKI</b> - Redundant multiphase isolated DC-DC converter with parallel current sharing for DC nano grid applications   | 75  |
| 15 | <b>Andrzej RADECKI, Piotr CHUDZIK</b> - The analysis of traction vehicle ultracapacitor control methods in chosen states of traction power grid   | 81  |
| 16 | <b>Krzysztof PRZYBYŁA, Marcin KASPRZAK</b> - Influence of transistor's case on efficiency of Class DE inverter from 13.56 MHz band  | 87  |
| 17 | <b>Tomasz SOBIERAJ</b> - Selection of the parameters for the optimal control strategy for permanent-magnet synchronous motor  | 91  |
| 18 | <b>Adam SOŁBUT</b> - Analysis of the drive with induction motor when frequency of supplying voltage is unknown  | 95  |
| 19 | <b>Tomasz TARCZEWSKI, Michał SKIWSKI, Lech M. GRZESIAK, Marek ZIELIŃSKI</b> - Constrained state feedback control of PMSM servo-drive  | 99  |
| 20 | <b>Karol TATAR, Piotr LEŚNIEWSKI, Piotr CHUDZIK</b> - Sliding mode control of DC-DC converter with low damped input filter  | 106 |
| 21 | <b>Leszek WYDŹGOWSKI, Łukasz J. NIEWIARA, Tomasz TARCZEWSKI, Lech M. GRZESIAK, Marek ZIELIŃSKI</b> - Single-phase DC-AC bridge converter with GaN GIT transistors   | 111 |
| 22 | <b>Piotr ZIMOCH</b> - Quasi – resonant two-phase DC/DC boost converter  | 116 |
| 23 | <b>Marcin ZYGMANOWSKI, Jarosław MICHALAK, Michał JELEŃ</b> - Correct input current measurement of DC/DC boost converter operating in discontinuous conduction mode  | 120 |
| 24 | <b>Mirosław WCISLIK, Paweł STRZĄBAŁA</b> - Analytical model of single-phase AC circuit with inductance and bridge rectifier   | 126 |
| 25 | <b>Włodzimierz KAŁAT, Tadeusz DASZCZYŃSKI</b> - Measurements and calculation of self inductance of testing coils used in physical transformer model construction and its frequency analysis   | 130 |
| 26 | <b>Mirosław PAROL, Łukasz ROKICKI, Rafał PAROL</b> - Optimal operation control of low voltage microgrids in rural areas functioning on the basis of centralized control logic   | 134 |
| 27 | <b>Konrad SOBOLEWSKI, Michał WOJCIECHOWSKI</b> - Comparative analysis of DC-DC inverters as a means of protection against nanoseconds impulses  | 139 |
| 28 | <b>Marian PASKO, Marek SZYMCZAK</b> - Application of an active EMI filters to reduction conducted noise generated by a frequency inverter   | 143 |
| 29 | <b>Borys BOROWIK</b> - Visualization of physical quantities in electro-dynamical process metal forming  | 147 |
| 30 | <b>Jerzy MARZECKI</b> - Optimal location of distributed generation sources in a medium voltage rural network  | 151 |
| 31 | <b>Dariusz SOBCZYŃSKI</b> - Model of PV inverter in H4 and H5 topologies for power loss analysis  | 155 |
| 32 | <b>Jacek GUMIELA, Dariusz SZTAFROWSKI</b> - Application of additional grounded wires in high voltage overhead power lines to reduce the intensity of electric field generated by phase wires  | 159 |
| 33 | <b>Anna GROCHOLEWSKA-CZURYŁO, Marek RETINGER</b> - Secure cloud services — extended cryptographic model of data storage   | 162 |
| 34 | <b>Łukasz STASZEWSKI, Waldemar REBIZANT</b> - Overcurrent protection relays, for the sake of avoiding future blackout occurrences   | 168 |
| 35 | <b>Paweł TERLIKOWSKI, Józef PASKA</b> - Methodology for polish power system cross-border transmission capacity calculation with particular emphasis on the asynchronous tie-lines   | 176 |
| 36 | <b>Kornelia BANASIK, Andrzej Ł. CHOJNACKI</b> - Economic effects of not delivering electricity to municipal consumers   | 181 |
| 37 | <b>Małgorzata ZALESIŃSKA, Julita ZABŁOCKA, Krzysztof WANDACHOWICZ</b> - Measurement and evaluation of selected parameters for non-directional household lamps   | 188 |
| 38 | <b>Milan ŠIMKO, Milan ŠEBOK, Milan CHUPÁČ, Daniel KORENČIAK, Miroslav GUTTEN, Katarzyna PIOTROWSKA, Paweł ZUKOWSKI, Tomasz N. KOLTUNOWICZ</b> - The delay line with a surface acoustic wave for an oscillator of electric signals in some sensors | 193 |
| 39 | <b>Alexander S. FEDOTOV, A.V. PASHKEVICH, L.A. BLIZNYUK, Julia KASIUK, Alexander K. FEDOTOV, N.A. BASOV, Ivan A. SVITO, M. BUDZYŃSKI, M. WIERTEŁ, Paweł ZUKOWSKI</b> - Electric properties of composite ZnO-based ceramics doped with Fe          | 197 |
